## SECURITY

All data transported between the servers is encrypted.

All data transported from the web server is HTTPS.

The encryption key is store specific.

All servers reside behind the firewall

Supports VPN

IP Authentication (Servers will only talk to verified IP addresses)

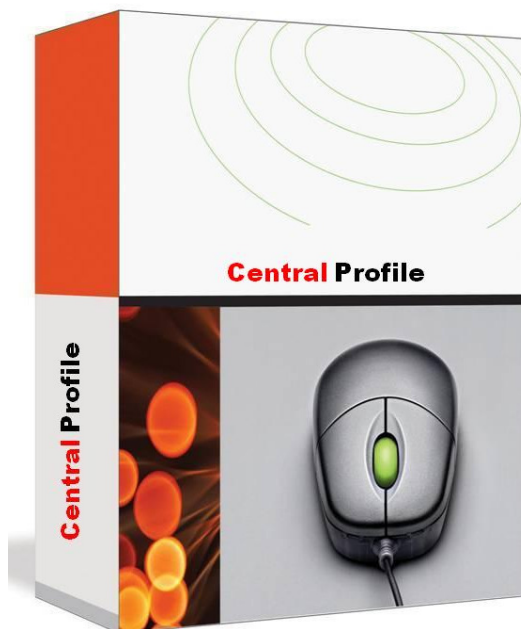

All confidential data remains at the pharmacy.

PIPEDA compliant (No profile data is stored on any of the servers)

Password and pin required to access data

Password and pin authenticated on each request

## Central Profile

Central Profile brings internet banking functionality to retail pharmacy without the need to centralize and consolidate all the data.

By adding a few modules to the pharmacy's existing infrastructure, Central Profile gives centralized functionality at an economical price. It does so within regulatory guidelines.

The patient can view and order from multiple stores at their convenience and on their device of choice anywhere, anytime. (Cell phone, Smartphone, Web Browser)

Central Profile can be added as a link to your existing website or it can start your presence on the web. The look and feel is fully customizable using templates.

Whether you are one store or a chain of stores Central Profile can empower your patient with the tools to manage their health anywhere anytime.

- Integrated with your existing dispensary system. (Currently works with Nexsys and Kroll).
- Secure access to view prescription profiles in real time over the internet using your computer or mobile device. 7x24 access 365 days a year
- Easy online Refill ordering anywhere anytime. Order prescriptions using the internet or any internet mobile device. The refill order will automatically be placed on the Todo section of your dispensary system.
- Track the following values online: Blood Pressure, Cholesterol & Blood Sugar
- Magnetic Card Reader and Bar Code Scanner Supported to reduce Data Entry
- Allows one consolidated profile to be viewed online from all participating stores
- Personalized Drug information (Monograph) available online in one simple click. (Even on your mobile phone!)
- View images of your pills as part of the profile for easy identification and ordering.
- Promote Special Events and allow online booking of appointments. (Medscheck, diabetic clinics etc.)

## Technical Architecture

### INSTALLATION

#### PHARMACY

A Windows Service needs to be installed (Amjay Nexsys\Kroll Server) The Enrolment Application also needs to be installed. This allows the pharmacy to issue and administer patient cards. It also allows adding patient information to Nexsys\Kroll by reading the magnetic stripe on a drivers license or health card.

(Supports magnetic card reader and barcode scanner)

Firewall and Routers need to be configured

#### HEAD OFFICE

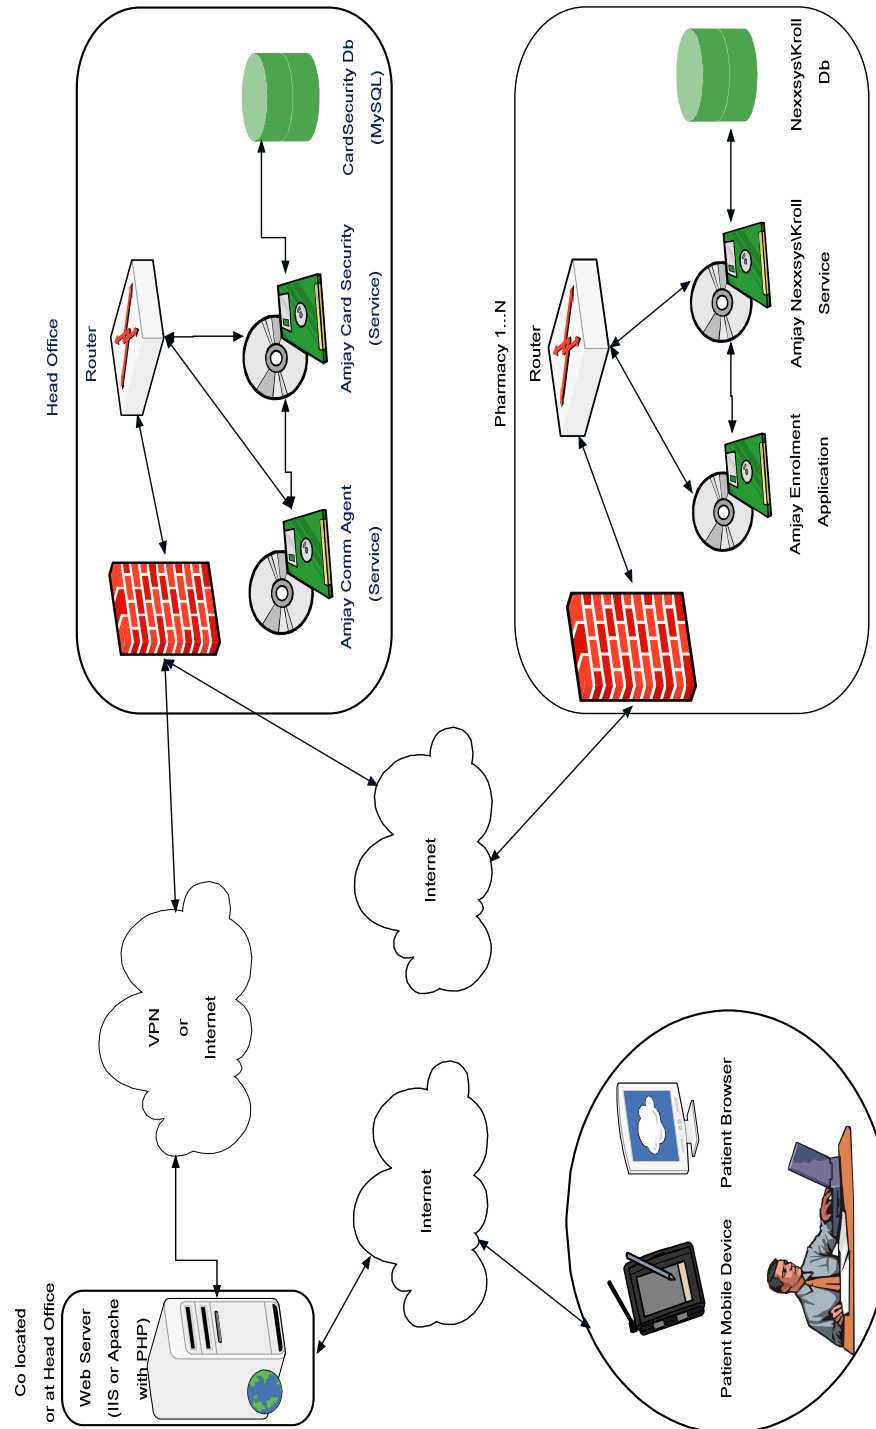

Two Windows services need to be installed. (Amjay CommAgent and AmjayCardSecurity)

MySQL also needs to be installed.

Firewalls and routers need to be configured

#### WEB SERVER

IIS or Apache with PHP needs to be installed. Templates for look and feel need to be edited.
